MARCH/APRIL 1988

CONTENTS

Physiologic Attributes of the Luteinizing Hormone Pulse Signal in the Human: Cross-Validation Studies in Men	Johannes D. Veldhuis, William S. Evans, Randall J. Urban, Alan D. Rogol, and Michael L. Johnson	69
Immunohistochemical Localization of β-Endorphin in Hyperplastic Interstitial Tissue of the Human Testis	Giovanni Spera, Elena Di Benedetto, Paolo Falaschi, Andrea Fabbri, Giuliana Lauro, and Marina Bolotti	78
Computer-Assisted Human Semen Analysis: Sampling Errors and Reproducibility	Kenneth A. Ginsburg, Kamran S. Moghissi, and Ernest L. Abel	82
Epididymal Markers in Human Infertility	Trevor G. Cooper, Ching-Hei Yeung, Dorothee Nashan, Eberhard Nieschlag	91
A Microperfusion Chamber for Study of Mammalian Spermatozoa	Lani Johnson Burkman	102
The Sperm Chromatin Structure Assay: Relationship with Alternate Tests of Semen Quality and Heterospermic Performance of Bulls	Brenda E. Ballachey, Donald P. Evenson, and Richard G. Saacke	109
HCG Treatment Increases Intratesticular Pressure in the Abdominal Testis of Unilaterally Cryptorchid Rats	Mats Hjertkvist, Anders Bergh, and Jan-Erik Damber	116
Interactions of Androgens and Prolactin in the Seminal Vesicles of Mature Bonnet Monkeys, <i>Macaca radiata</i>: I. Nucleic Acids and Phosphatases	J. Arunakaran, M. Michael Aruldas, and P. Govindarajulu	121
Effect of Germ Cells on Vectorial Secretion of Androgen Binding Protein and Transferrin by Immature Rat Sertoli Cells <i>In Vitro</i>	Andrzej Janecki, Andrzej Jakubowiak, and Anna Steinberger	126
The Human Bulbo-Urethral Glands: A Transmission Electron Microscopy and Scanning Electron Microscopy Study	Alessandro Riva, Enzo Usai, Margherita Cossu, Roberto Scarpa, and Francesca Testa-Riva	133
Effects of Cyclophosphamide on Selected Cytosolic and Mitochondrial Enzymes in the Epididymis of the Rat	Jacquetta M. Trasler and Bernard Robaire	142
Announcements		81, 90, 101, 108, 125
